Polish

Vietnamese

Haitian Creole

Portuguese (Brazil)

These languages reflect some of the most frequently requested languages across our healthcare clients and are prioritized for fast, on-demand video access. Current VRI language list as of January 2026. Updated lists will be shared as new languages and hours are added.

Beyond this list: VRI + OPI working together

If you need a language that is not listed above, or if video wait times are longer than expected, your users can **seamlessly roll over** to our **24/7 Over-the-Phone Interpreting (OPI)** service directly from the InterpreterConnect interface.

Our OPI service supports **200+ languages** (including many less commonly requested and Indigenous languages) and is available 24/7/365.

We regularly adjust and expand on-demand video language coverage based on actual language mix and volumes across our clients. As usage grows in specific languages and time periods, we prioritize adding new VRI languages and extending hours where demand is highest.
